Welcome to Cambaum

Your reliable partner for physical access solutions worldwide

Cambaum provides innovative and reliable high-quality products

Cambaum as a manufacturer of physical access systems stands for quality, innovation, safety and security.

Our core competences include design, development and production of access solutions for sensible areas in e.g. airports, industrial buildings and sites

as well as sports facilities. We rely on optimum functionality for the applications of our customers and also on comfortable operation for their passengers, employees or visitors.

Our visions guide our way and inspire our goals

Innovation Leader

We strive to become the innovation leader in our sector and to offer outstanding and innovative products.

Setting Standards

With our products and solutions we aim at setting new standards in all areas. We offer a wide range of solutions which all meet the highest standards in engineering, design, safety, reliability and service.

Customer Satisfaction

At Cambaum the customer takes the center stage. All our products and solutions are developed and manufactured according to our customers' requirements.

Our values guide us daily with great impact on all our decisions

Security / Safety

For us security and safety come first. All our employees are trained according to all rules, norms and regulations.

Responsibility

We take responsibility for our employees, our company and the society.

Our solutions ensure the security of the situation and the safety of the user

Airports

In the field of security controls at airports, Cambaum offers innovative technology of the latest generation to manage the increasing numbers of passengers.

Our automated and modular developed access systems increase the security during self-boarding, bordercrossing and passage from air- to land-side.

Buildings

The physical access control systems from Cambaum are suitable for various application areas such as office buildings, hotels, and industrial sites as well as public facilities or private entities for staff and visitor access control.

These systems ensure authorized access to secure or restricted areas.

Industry & Sports

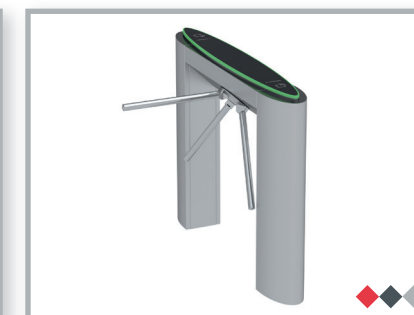

Employee and visitor access are easily manageable with the intelligent products and solutions by Cambaum. The modular systems can be combined with any identification technology for access control.

They grant safe access on the perimeter of sites, into industrial buildings and sports facilities.

Our products are developed close to customer requirements
